

PACK-TO-LIGHT

Lightning Pick's Put-to-Store System

Retail Store Replenishment Method

Pack-to-Light is a highly-sophisticated put-to-light solution specifically engineered for distribution centers servicing retail stores.

Also called "Put-to-Store," Pack-to-Light is ideal for retail store replenishment, and optimizes cross-docking operations where a percentage of full case quantities are broken down to store-level cartons.

With Pack-to-Light, cases of merchandise are routed to the DC's break pack area. An operator scans the case and lights illuminate, directing quick sortation of the product to the right store carton and in the right unit quantities. Once the product is put to the store carton, the light module is extinguished to confirm the activity was completed.

Faster Flow-Through

Pack-to-Light's powerful Lightning Pick software successfully manages flow-through sortation processes throughout multiple distribution centers and across demanding supply networks.

Pack-to-Light allows customers to manage a variety of specific process requirements through Lightning Pick at one or more fulfillment centers.

Pack-to-Light

Lightning Pick Put-to-Store System

Easy to Expand

Pack-to-Light's proven light module design gives it the scalability and flexibility to accommodate store location changes quickly and growth in a wide variety of rack and conveyor configurations.

Special Features

- ▶ Carton-level manifest updates
- ▶ Labor productivity data
- ▶ Warehouse Control System (WCS) integration
- ▶ Warehouse Execution System (WES) integration
- ▶ Interface with workforce planning tools
- ▶ Real-time event messaging
- ▶ Push/pull inventory techniques
- ▶ Manages multiple open purchase orders
- ▶ Close carton and split case capability
- ▶ Scan product UPC option
- ▶ Multi-case distributions
- ▶ Dynamic zoning

About Matthews

Matthews Automation Solutions' best-of-breed product for light-directed technologies, Lightning Pick, is the number one installed pick-to-light system in North America. Our pick-to-light, put-to-light, pack-to-light, pick carts and other solutions optimize material handling processes — from manufacturing through order fulfillment.

Let's talk about your application.
